

Healing Your Tattoo

TRADITIONAL BANDAGE CARE INSTRUCTIONS.

Keep your bandage on for at least 3, but no longer than 12 hours.

Always wash your hands before you touch your Tattoo while it is healing and when you remove your bandage.

Wash your Tattoo twice a day with an anti-bacterial liquid soap.

Avoid soaps with perfumes or agents that exfoliate and bar soaps.

Avoid over washing your Tattoo, or soaking it while it is healing.

Dry your Tattoo by patting it with a clean towel, or use a paper towel.

Apply a thin amount of AQUAPHOR to your Tattoo like you would apply sunscreen.

Wash your hands and reapply AQUAPHOR as needed. Just enough to keep your Tattoo from getting dry and or tight feeling, but not so much that it suffocates your Tattoo. Approximatley 2-4 times a day for 1 week or untill fully healed.

While healing DO NOT re-bandage your Tattoo.

DO NOT submerge your Tattoo (no hot tubs, swimming, or baths while you are healing). Showers are fine.

DO NOT Sun bath, OR tan while healing.

Use Common Sense. Wear comfortabe clothes that don't restrict or irritate your healing Tattoo.

Your Tattoo will peel while healing, don't pick or scratch at it.

SANIDERM BANDAGE CARE INSTRUCTIONS.

You may leave your Bandage on up to BUT no longer than 48 hours, gently work your bandage off using warm water and soap, then follow the above care instructions.
